DETAILED ACTION

1. According to paper filed on June 01, 2004, the applicants have elected group I with traverse in response to restriction requirement.

Response to Arguments

2. Applicant's arguments filed on June 01, 2004 regarding restriction requirement have been fully considered but they are not persuasive. The examiner does not agree with the applicant's arguments that searching all five groups will not be burdensome. First of all, variable Z is critical for the common core of the instant compounds. Secondly, the compounds of five different groups are classified in different subclasses of classes 546, 548, 549 and 544 based on the value of variable Z and therefore, does constitute a burdensome search. Thus, restriction requirement as indicated is proper and thereby made final.

3. Claims 1, 2, 5-9 and 12-15 are now pending in the application.

EXAMINER'S AMENDMENT

4. The following amendment is pursuant to a telephone conversation with the applicant's attorney, Mr. Gabor L. Szekeres on June 29, 2004. The following changes have been made in claims.

In claim 1, for the value of variable Z, delete -----N=CR1-, -CR1=N-, -NR1-CO, -NR1-CS, -COO-, -OCO-, -CSO- and -OCS- -----in order to delete non-elected subject matter.

In claim 1, definition of variable R15, line 2, after COOR8, insert --- , ----.

Art Unit: 1625

In claim 15, line 1, after claim 9, delete ---wher--- and insert ---where ---.

REASONS FOR ALLOWANCE

5. The following is an examiner's statement of reasons for allowance:

Claims 1, 2, 5-9 and 12-15, renumbered as 1-11, are allowed since the instant compounds directed to the elected group are neither disclosed nor obvious over the prior art. In the prior art, Klein (U.S. Patent no. 5,776,699, cited on applicant's form 1449) discloses compounds of formulae 2 and 3 where Z represents $-N=N-$ (see compounds 46a and 46b in table 1 in columns 13-15) which are closely related to the instant compounds. However, these two exemplified compounds of Klein differ from the instant compounds in having a phenyl group attached to variable Z instead of a heteroaryl group (variable Y in instant compounds) and furthermore, there is no motivation in the prior art to modify the compounds of Klein to prepare the instant compounds.

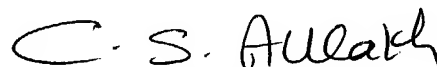

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
